Course Title: Web Technologies
Lab sheet 4

Problem Statement: Eureka Info Solutions has acquired online shopping cart project from a leading bookseller in Bangalore. They want to sell engineering textbooks online, so you are the team leader of the project and divide the modules based on user requirement, given requirement/module is designed by developers, and finally you integrate all the modules into one static website using HTML

Instructions:

The web page should have the following things:

1. **HOME PAGE:** The static home page must contain three frames.
 - **Top frame:** - top of the page to place PU banner and links to homepage, login page, registration page and catalogue page.
 - **Left frame:** - at least four links for navigation which will display the catalogue of Respective links.
 - **Right frame:** - the pages to links in the left frame must be loaded here initially it Contains the description of the website.
2. **LOGIN PAGE:** to get username and password
3. **CATALOGUE PAGE:** The catalogue page should contain the details of all the books available in the web site in a table.
4. **REGISTRATION PAGE:** to get user details
