

Course Code: CSE2259
Course Title: Web Technologies
Lab sheet 5

Problem Statement: Design and develop a simple multi-page quiz website. The site should include the following sequence of pages and functionality:

1. Instruction Page (Home Page)

- Display the quiz title and clear instructions/rules for the quiz (e.g., time limit, scoring, how to attempt).
- Provide a **“Next”** button that takes the user to the registration page.

2. Registration Page

- A form to collect basic student details such as Name, Roll Number/ID, Email, and Department/Class.
- Include a **“Start Quiz”** button that, after successful form submission/validation, takes the user to the quiz page.

3. Quiz Page

- Present 5 multiple-choice questions, each with 4 options.
- Allow the user to select one answer for each question.
- Provide a **“Submit”** button to submit the quiz.

4. Thank-You Page

- After submission, display a confirmation message such as “Thank you for participating in the quiz!”
- Optionally show the user’s name and a short appreciation note.

Requirements & Guidelines:

- Use **external and inline** CSS for styling to make it visually appealing and consistent across pages.
- You can add simple content to the page but need more of CSS
- You can use previous code from previous labs such as registration form, instruction form, thank you form.
